

About Microban® Antimicrobial Protection

The iSkin revo4 features built-in Microban® antimicrobial protection. Microban's globally trusted antimicrobial protection is used widely in a variety of consumer items, such as baby products, personal care products, food storage products, and more. Microban protection provides continuous antimicrobial cleaning action to inhibit the growth of bacteria, mold and mildew, which can cause deterioration of your product. iSkin is the only accessory manufacturer to offer its valued customers Microban protection.

revo4 SE
User's Guide

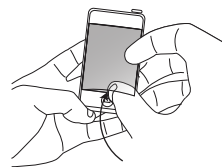

Welcome

revo4 SE (for iPhone 4)

Thank you for choosing the iSkin revo4 SE to protect your beloved iPhone 4. The all new revo4 SE continues the award-winning tradition that goes above and beyond, with shock, moisture, impact protection and ViSOR™ screen shield. Its precision engineering and stylish design, coupled with iSkin fit and finish make it the best protection for an iPhone!

1 Prepare your iPhone

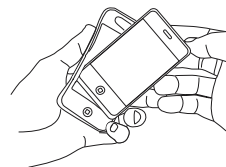

For optimal fit and performance, it may be necessary to remove any previously applied screen/body films from the iPhone prior to using the iSkin revo4 SE.

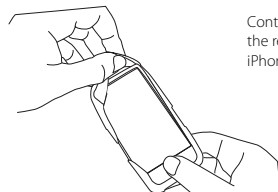

Gently and thoroughly clean your iPhone using a soft, lint-free cloth, and remove all surface dirt or oil. Also ensure that you wipe the screen to remove any small dust particles.

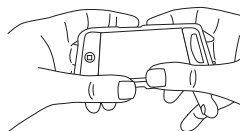

2 Placing the iPhone into the revo4

Insert the iPhone into the lower portion of the revo4 SE, as shown.

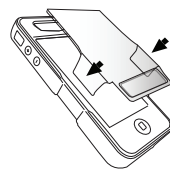

Continue the installation by lifting the remaining sides over the iPhone until fully covered.

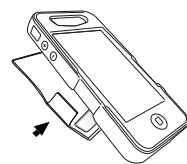

If necessary, massage the revo4 SE to align with all buttons and corners of the iPhone.

3 Using the ViSOR™

The iSkin revo4 SE includes a unique hard plastic ViSOR that provides effective impact protection for your iPhone's vulnerable glass screen. It's designed to be used when your iPhone is placed in a bag or not in use. The ViSOR snaps securely over the front of the iPhone to provide effective screen protection. The ViSOR conveniently snaps to the back of the revo4 SE to give you complete access to your screen.

To install the ViSOR, place over top of the iPhone's screen allowing the two tabs on its side to lock with the iSkin revo4.

To stow the ViSOR, simply snap to the rear allowing the two tabs on its side to lock with the iSkin revo4.

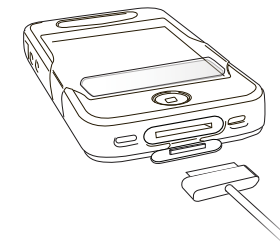

4 Cleaning

Over time, tiny particles may find their way in between the iSkin and the iPhone. It is recommended that you completely remove the iPhone and rinse only the iSkin with warm or hot water to remove any buildup. **Dry the iSkin thoroughly before reinserting the iPhone.** In addition, wipe your phone using a Microfiber Cloth to remove any surface dirt before reinserting it into the iSkin revo4 SE.

Repeating this process every so often will help keep your iPhone looking great over time.

5 Integrated Dock Connector Protector

The iSkin revo4 SE features an integrated iPhone dock connector protector that seals to protect it from harmful particles or moisture. It is recommended you always keep your iPhone's charging port sealed to avoid accidental damage.

6 FAQ's

Q. What is the iSkin revo4 SE made with?

A. The revo4 SE is made with pure hypoallergenic GE/Toshiba silicone that does not contain phthalates, lead or BPA's, making it a safe option for everyday consumer use.

Q. Will the iSkin revo4 SE help with the iPhone 4's antenna reception?

A. The iSkin revo4 SE does help to improve reception by creating an insulated barrier between the iPhone 4's antenna and your hands, thus improving reception performance.

Q. How thick is the iSkin revo4 SE?

A. On average, the iSkin revo4 SE adds a mere 2.0mm of surface to the iPhone 4, giving ample protection without bulk that works to keep your iPhone looking great!
