→ Whose iSkin?

Give your iPod a funky look with this iSkin eVo 2. It is a protective case, designed for click wheel iPods and made from high-grade silicone, which moulds to the outside of the machine. You can charge the iPod and connect accessories through the skin while protecting it from dirt, dust and liquid. The skin even has heat-resistant pores to keep your iPod cool when in use. Cost is £19.99, including VAT, and it is available in a range of colours. See www.iskin.com for more details.
